SUMMARY

Artificial Intelligence & Data Science undergraduate with hands-on experience in **Python, Machine Learning, Data Analysis, Full-Stack Development, NLP, AI APIs, IoT, and modern web technologies**. Experienced in developing AI-powered applications, industrial optimization platforms, responsive websites, and IoT-based intelligent systems. Built projects using React, FastAPI, Streamlit, Scikit-learn, Supabase, ESP32, and cloud/API-based technologies. Active participant in hackathons, technical competitions, project demonstrations, presentations, and student innovation activities, with a strong interest in **AI/ML, software development, IoT, robotics, and intelligent systems**

ACHIEVEMENTS

- Member of SIH 2025 Shortlisted Team
- Member of RTMSSU Ideation Competition 3.0 Shortlisted Team
- Winner — Logo Making Competition
- Participant — Code Mania 6.0
- Winner-PosterX Competition by IEEE
- VISHWAKARMA AWARDS SHORTLISTED TEAM

TECHNICAL SKILLS

Programming: Python, Core Java, Advanced Java, C, C++, JavaScript
Web / Frameworks: React (Vite), FastAPI, Flask
Database: SQL, MySQL,Supabase
Libraries: Pandas, NumPy, Scikit-learn
AI / APIs: Groq LLM API, OpenAI Whisper, Azure Cognitive Services (Speech)
Tools: GitHub, Google Colab, Streamlit, VS Code
Concepts: Machine Learning, Data Analysis, Predictive Modelling, NLP, Full-Stack Development

PROJECTS

Milo AI — Multilingual AI Voice Assistant

- Built a full-stack, hands-free voice assistant supporting Hindi, Marathi, Gujarati, and English using a React (Vite) frontend and FastAPI backend.
- Integrated Groq LLM for conversational responses and OpenAI Whisper for multilingual speech-to-text transcription.
- Implemented Azure Cognitive Services text-to-speech and a real-time animated Live2D avatar with audio-amplitude-driven lip-sync.
- Designed a custom NLP command parser (Hinglish + Devanagari) to route voice commands to task-specific actions — WhatsApp messaging, YouTube playback, weather lookup, and app launching.

Tech: Python | FastAPI | React | Groq API | Whisper | Azure Speech SDK | Live2D | JavaScript

EcoCore AI — *AI Industrial Energy & Carbon Optimization Platform*

- Developed an AI-based platform for **industrial energy monitoring and carbon-emission optimization** for manufacturing environments.
- Built machine learning models to analyze industrial energy consumption and identify energy/emission patterns.
- Developed an interactive **Streamlit dashboard** for industrial data input, analysis, predictions, and recommendations.
- Used **Pandas, NumPy, and Scikit-learn** for data preprocessing and machine learning.
- Designed a B2B SaaS concept focused on **energy efficiency and carbon optimization for Indian MSME manufacturing units**.
- Explored integration of IoT/advanced meter data with AI analytics and cloud-based dashboards.
- Worked on compliance-oriented reporting concepts based on **BEE and ISO 50001** requirements.

Tech: Python | Scikit-learn | Pandas | NumPy | Streamlit | Machine Learning | GitHub

AI-Enabled Cloud-Based Smart Lost & Found System

IoT / Robotics Academic Project

- Designed an IoT-based 4WD robotic system for a smart lost-and-found application.
- Working with ESP32 DevKit, ESP32-CAM, ultrasonic sensor, DC geared motors, motor driver, battery system, LEDs and buzzer.
- Designed the system to use a mobile phone dashboard/display instead of an OLED display.
- Exploring wireless communication between the robotic system and mobile/cloud interface.
- Designed the project around intelligent monitoring, object searching, and IoT-based system interaction.

Tech: ESP32 | ESP32-CAM | Arduino | IoT | Sensors | Embedded Hardware | DC Motors | Mobile Dashboard

---

Linga Global School — Responsive Full-Stack Website

Client Project / Website Development

- Developed a modern responsive website for **Linga Global School**.
- Built reusable frontend components using **React and Vite**.
- Implemented responsive layouts and interactive UI using **Tailwind CSS and Framer Motion**.
- Developed sections including academics, admissions, transportation, facilities, leadership, campus gallery, activities, celebrations, student life, and campus tour.
- Integrated interactive gallery categories and multimedia-based campus presentation.
- Worked on backend/content integration using **Supabase**.
- Focused on professional UI/UX, responsive design, performance, and deployment-ready development.

Tech: React | Vite | JavaScript | Tailwind CSS | Framer Motion | Supabase

EDUCATION

Bachelor of Engineering (B.E.) — Artificial Intelligence and Data Science

Institution: **Marathwada Mitra Mandal Institute of Technology, Savitribai Phule Pune University**
Year of Study: **3 rd Year (Expected Graduation: 2028)**
CGPA: **8.95**

Higher Secondary Certificate (12th)

Institution: **Modern Education's Society Nowrosjee Wadia College, Pune**
Year of Passing: **2024**
Percentage: **70%**

Secondary School Certificate (10th)

Institution: **Nirmala Convent High School, Pune**
Year of Passing: **2022**
Percentage: **80**
